

International Discussion Forum!

Let's have a casual opinion exchange with Japanese and non-Japanese residents of Kagoshima!

Theme : Family life and child-rearing

How do foreigners view Japanese parent-child relationships?

When non-Japanese people talk about Japanese people, one of the most common topics is “family dynamics”. For example, parent-child communication styles, physical contact, discipline, etc. Something that seems “obvious” to a Japanese person may not be so obvious to someone from another country. Let's hear what Japanese people think about this topic!

We are recruiting foreign nationals as observers for the opinion exchange.

★About 10 students from the Kagoshima International Association's Japanese language class will participate.

★This event is being conducted as part of the Japanese language course.
